

PRAVEEN RAJU

Software Engineer at Mountblue.io

9066784510 | praveenraju0011@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

An analytical and results-driven software engineer with experience in full stack development, automation and scalable system design. Proficient in frontend and backend technologies, database management and API integration with a strong focus on building efficient, maintainable and user-friendly applications.

WORK EXPERIENCES

Software Engineer | Full-time
Mountblue.io

Oct 2024 - Present
Bengaluru, Karnataka

- Client – Varthana Finance, Project – Sparsh (Loan Application Platform):
 - Designed and implemented end-to-end workflows** for loan submission, validation, and status tracking for business and individual users.
 - Developed a responsive, user-friendly UI** and integrated with **GTR APIs** for real-time data synchronization.
 - Optimized backend workflows** to support high concurrency and enabled custom client input configurations through a low-code platform, addressing unique client requirements.
 - Collaborated with cross-functional teams** to enhance scalability, reliability, and maintainability, resulting in a significant upgrade with Sparsh 2.0.
- Client – Indegene, Project – Banner (Pharmaceutical Advertisement Creation Platform):
 - Developed a web-based creative banner editor** allowing pharmaceutical teams to design and publish compliant digital ads with customizable templates, streamlining regulated marketing campaigns.
 - Implemented drag-and-drop UI components** and template management systems to accelerate ad creation, incorporating client-specific branding and content.
 - Established automated compliance and approval workflows** to uphold regulatory requirements for medical advertising, partnering with UX designers to enhance usability and governance.

Technologies / Skills Used : *React, Express, Node.js, Tailwind CSS, PostgreSQL, MongoDB, ShadCN, TanstackQuery, Redux*

Associate Software Developer | Full-time
One Origin

Jun 2022 - Sep 2024
Bengaluru, Karnataka

- Developed** and maintained **SIA**, a document-processing platform utilizing **Google Cloud OCR** to digitize U.S. school and college transcripts, **enhancing data accessibility** and **reducing processing time**.
- Implemented** robust data filtering and validation pipelines, ensuring high accuracy and relevance of extracted transcript data.
- Designed** and optimized a user interface for viewing processed transcript data, facilitating efficient search, review, and analysis of candidate academic records.
- Built** modular server-side services to accommodate client-specific transcript formats, improving processing efficiency and **minimizing development effort**.

Technologies / Skills Used : *Node.js, Express, MongoDB, Vue.js, Bootstrap, Google OCR*

SKILLS

Databases:	MySQL, PostgreSQL, MongoDB, Redis
Frontend Technologies:	React.js, Vue.js, Tailwind CSS, Material UI, ShadCN UI, GSAP, TanStack
Backend Technologies:	Node.js, Express.js
Programming Languages:	JavaScript, SQL, HTML5, CSS3
Tools & Platforms:	Git, GitHub, GitLab, Bitbucket, Docker, Jenkins, CI/CD, Vercel, Netlify, Postman, VS Code, Chrome DevTools, Jira
Languages:	English, Kannada, Hindi, Telugu, Tamil
Soft Skills:	Problem Solving, Critical Thinking, Communication, Adaptability

EDUCATIONS

Vels University of Technology | Chennai
B.E. Computer Science

Aug 2017 - Jul 2021
